Art Unit: 2837

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 77-91 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gabai et al in view of Ohya et al.

Gabai et al discloses comprising commencing robot competition and providing a remote control mechanism for robot competition, for plurality of robots independent of person operating robots, see paragraph (0015)-(0016) and paragraphs (0022) -(0023) and paragraph (0047). Gabai et al lacks disclosing disabling mechanism. Ohya et al discloses disabling mechanism, see fig 2 and col 3 lines 15-25 and lines 45-55. It would have been obvious to one of ordinary skill in the art to combine the robot competition of Gabia et al with disabling mechanism for improved control.
